

As the policy of Unison Colour is one of continuous improvement, colours are subject to slight modification without notice. This colour chart is produced with printing inks and therefore the colours can only be held as approximate. Unison Colour soft pastels have stood the test of time and are very durable and light fast. Traditional premium pigments are used in the manufacture of these colours and include the following: Cadmium, Cobalt, Oxide of Chromium, Viridian, Ultramarines, Cobalt Chromes, Natural and Synthetic Iron Oxides, Titanium Dioxide and China Clay.
Available at good artists' suppliers throughout the world.
